Junior Jobs - job platform

React · Rest APIs · Express · Node.js · MongoDB · JavaScript · HTML · CSS

Junior Jobs is a job platform for users to connect with companies - and apply for junior developer positions - and for companies to discover new talents to fill their vacancies.

The client runs on React while the server and the REST API run on Express.js.

The project has been showcased during the Hackshow on March 29th, 2023 in front of a live audience of 150 people and has been voted for the best project in the Web Development category.

E-commerce Admin-Dashboard

NextJS · TailwindCSS · JavaScript · MongoDB · Next-Auth · Sweetalert-2

This application was built using NEXT.JS and is styled with Tailwind CSS. It is sharing a database with the E-commerce Frontend, so mutating data here has direct influence on the Frontend-Application. The Project features Next-Auth and is mobile responsive.

E-commerce Frontend

NextJS · Styled Components · JavaScript · Stripe-Payment · React-Spinners

Built on the Next.js framework this is an e-commerce store with a modern minimalistic design. This is a complete online-shop that features: filtering by categories, saving Products to a Wishlist, Stripe Payment, Styled Components, various animations and of course Javascript

Education

Martin-Luther-Universität Halle / Informatik

Halle an der Saale
